

# 3-4 Answer Key

3-4. See below:

a. Typical response: "It's like what happens in a mirror: the left side flips over to the right side."

b.

# 3-6 Answer Key

3-6. See below:

- See graph at right.
- See graph at right. The  $x$ - and  $y$ -coordinates are switched.
- The line of reflection was  $y = x$ , so the  $x$ -coordinates are now the  $y$ -coordinates and vice versa.
