## CH. 8 Exponential Functions PRACTICE ASSESSMENT

Name $\qquad$ PER $\qquad$ DATE $\qquad$

| FLE1 | FLE2 | FLE5 | FIFC7e |
| :--- | :--- | :--- | :--- |
|  |  |  |  |

## Computation

| 4 | 3 | 2 | 1 |
| :---: | :---: | :---: | :---: |
| Response has no recall errors, minimal procedural errors* and no conceptual errors** | Response has no recall errors, minimal procedural errors and minimal conceptual errors | Response has no recall errors, but has several procedural errors OR several conceptual errors | Recall errors <br> exist OR <br> Steps taken are not related to problem OR <br> Response left blank |

## Written Responses

| 4 | 3 | 2 | 1 |
| :--- | :--- | :--- | :--- |
| Response is written <br> in a complete | Response is written <br> in a complete | Response is not <br> written in a <br> sentence and uses <br> sentence, and <br> appropriate <br> academic vocab | loncept of <br> response is not <br> exist in use of <br> acalence 0R <br> related to <br> problem OR <br> no academic vocab <br> Response is left <br> blank |

*Procedural errors are mistakes made in the math
${ }^{* *}$ Conceptual errors are mistakes made in the steps one take

## 1. (FLE1) Write your answer in complete sentences in the space provided.

Jamil has two bank accounts from which he has never withdrawn any money. The table below shows the balances in Jamil's two accounts over 6 years.

## Anil's Bank Accounts

| Time (years) | Account 1 | Account 2 |
| :---: | :---: | :---: |
| 0 | $\$ 200.00$ | $\$ 200.00$ |
| 1 | $\$ 240.00$ | $\$ 240.00$ |
| 3 | $\$ 320.00$ | $\$ 345.60$ |
| 6 | $\$ 440.00$ | $\$ 597.20$ |

If he never withdraws money from either account, explain how to determine which account exhibits linear growth and which exhibits exponential growth. Show your work.

## 2. (FLE1) Show your work neatly and circle the correct answer(s).

Mr. and Mrs. Davis each have a retirement account, and they have bank accounts for each of their two children. The tables below represent current balances for the four accounts after $x$ years.

Which of the accounts show an exponential growth pattern? Select all that apply.
A.

| $\boldsymbol{x}$ <br> (Number of <br> Years) | $\boldsymbol{y}$ <br> (Balance <br> in dollars) |
| :---: | :---: |
| 1 | 544 |
| 3 | 1,584 |
| 5 | 2,624 |
| 8 | 4,184 |
| 12 | 6,264 |

B.

| $\boldsymbol{x}$ <br> (Number of <br> Years) | $\boldsymbol{y}$ <br> (Balance <br> in dollars) |
| :---: | :---: |
| 2 | 469 |
| 3 | 687 |
| 5 | 1,123 |
| 7 | 1,559 |
| 10 | 2,213 |

C.

| $\boldsymbol{x}$ <br> (Number of <br> Years) | $\boldsymbol{y}$ <br> (Balance <br> in dollars) |
| :---: | :---: |
| 2 | 9 |
| 4 | 81 |
| 5 | 243 |
| 7 | 2,187 |
| 8 | 6,561 |

3. (FLE2) Show your work neatly and circle your answer.

This table shows pairs of values for a function, $f(n)$.

| $n$ | 1 | 2 | 3 | 4 | 5 |
| :---: | :--- | :--- | :--- | :--- | :--- |
| $f(n)$ | 1.5 | 0.3 | 0.06 | 0.012 | 0.0024 |

Which equation defines the function?
A. $f(n)=0.2(1.5)^{n}$
B. $f(n)=0.2(7.5)^{n}$
C. $f(n)=1.5(0.2)^{n}$
D. $f(n)=7.5(0.2)^{n}$
4. (FLE2) Show your work neatly and box your answer.

A lake was restocked with native trout. The number of trout increased by the same percent each year, as shown in the graph below.

Write a function that represents the relationship between $y$, the number of trout in the lake, and $x$, the years since the lake was restocked.
5. (FLE5) Explain your answer(s) in complete sentences in the space provided.

The number of ants in an ant colony can be estimated using the function shown below,

$$
f(t)=2 \cdot b^{t}
$$

where $f(t)$ represents the ant population in millions and $t$ represents time in years.
Which statements about the function are true? Choose all that are correct and explain how you know in the space below.
A. The number 2 in the function represents the beginning population in millions.
B. The value of $b$ in the function represents the beginning population in millions.
C. The value of $b$ in the function represents the growth rate of the function.
D. The value of $f(0)$ must be 1 because $b^{0}=1$.
E. The number 2 in the function represents the growth rate of the function.
F. The value of $f(1)$ must be 2 because $b^{1}=1$.

6. (FLE5) Write your answer in complete sentences in the space provided.

The value of a motorcycle changes according to the equation $V=5,000(1.03)^{t}$, where $V=$ value in dollars and $t=$ time in years.

What do the numerical values of the equation represent? Explain each in the space below.
7. (FIFC7e) Show your work neatly.

The number of movie rental stores in the country changed over a 10-year period as shown in the graph below. Let $x$ represent the time in years and $y$ represent the number of movie rental stores.

Which is the best approximation for the equation describing this relationship?
A. $y=9,000(0.9)^{x}$
B. $y=9,000-3,000 x$
C. $y=9,000(0.1)^{x}$
D. $y=9,000-6,000 x$
8. (FIFC7e) Show your work neatly.

The number of registered voters in a certain state is growing according to the equation $y=$ $4(1.25)^{x}$. If $x$ is the time in years and $y$ represents millions of voters, draw a graph that represents this equation.
(NOTE: label your axes!)
